

Distributed Data

# dataindependence.net

Keeping data in user's hands.

Artem Shamsutdinov

Co-worker

The banner has a blue background. On the left is a large white airplane silhouette with an orange 'D IN' logo on its tail. To the right of the airplane, the text 'AIRport' is in large white letters, and 'winged DApps' is in smaller white letters below it. Below this, the text 'DApps too much? Wing it with AIRport' is written in white. At the bottom, there are four small portrait photos of men. Between the second and third photos is the 'VOTECUBE' logo, which consists of two triangles (orange and purple) above the text 'VOTECUBE' and 'decide together' below it.

**Big Data Market was  
Valued at \$138.9 Bn in  
2020, almost none of it  
is peer-to-peer**

Expected to Grow to \$229.4 Bn at a CAGR  
of 10.6% by 2025

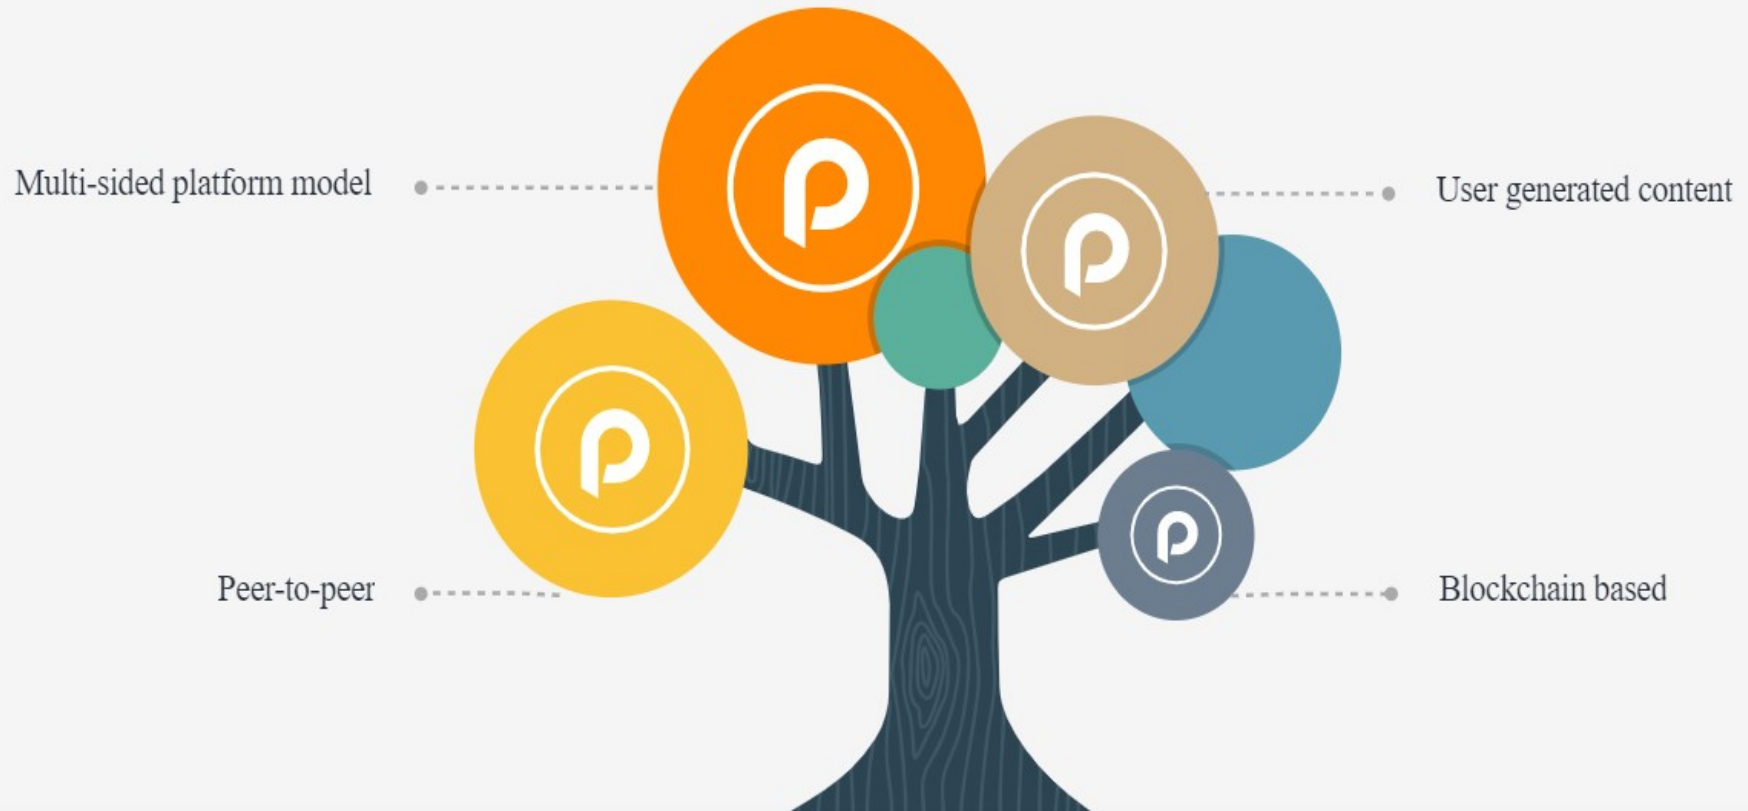

# Solution

Keeping data in user's hands.

# Our Business Model

## Our progress

[AIRport](#)

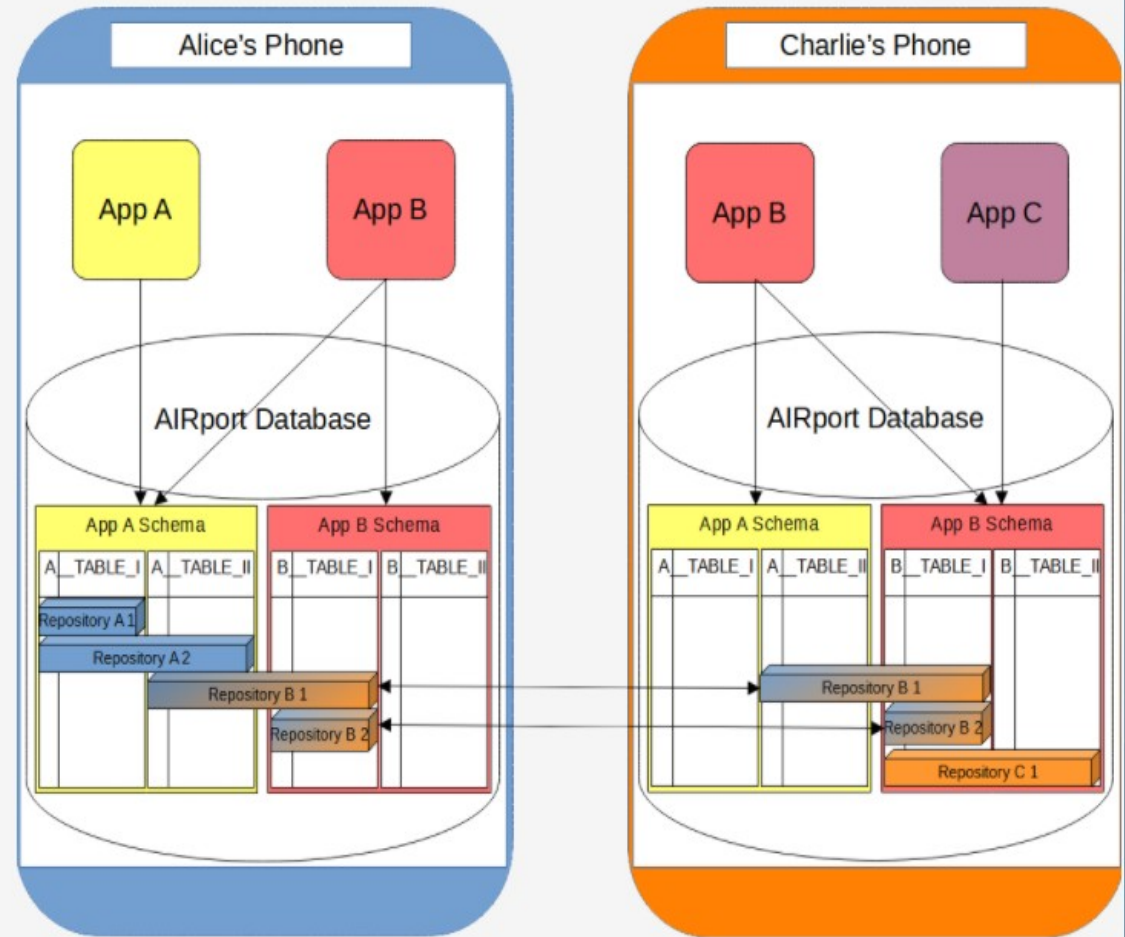

[Votecube](#)

# Peer-to-Peer Database

[github.com/autonomous-interdependent-repositories/AIRport](https://github.com/autonomous-interdependent-repositories/AIRport)

- Data w/o corporate servers
- Apps reuse existing schemas
- Apps as add-ons to other Apps
- Existing data for new Apps
- Peer-to-peer & central sharing
- Users control data
- Apps control schemas

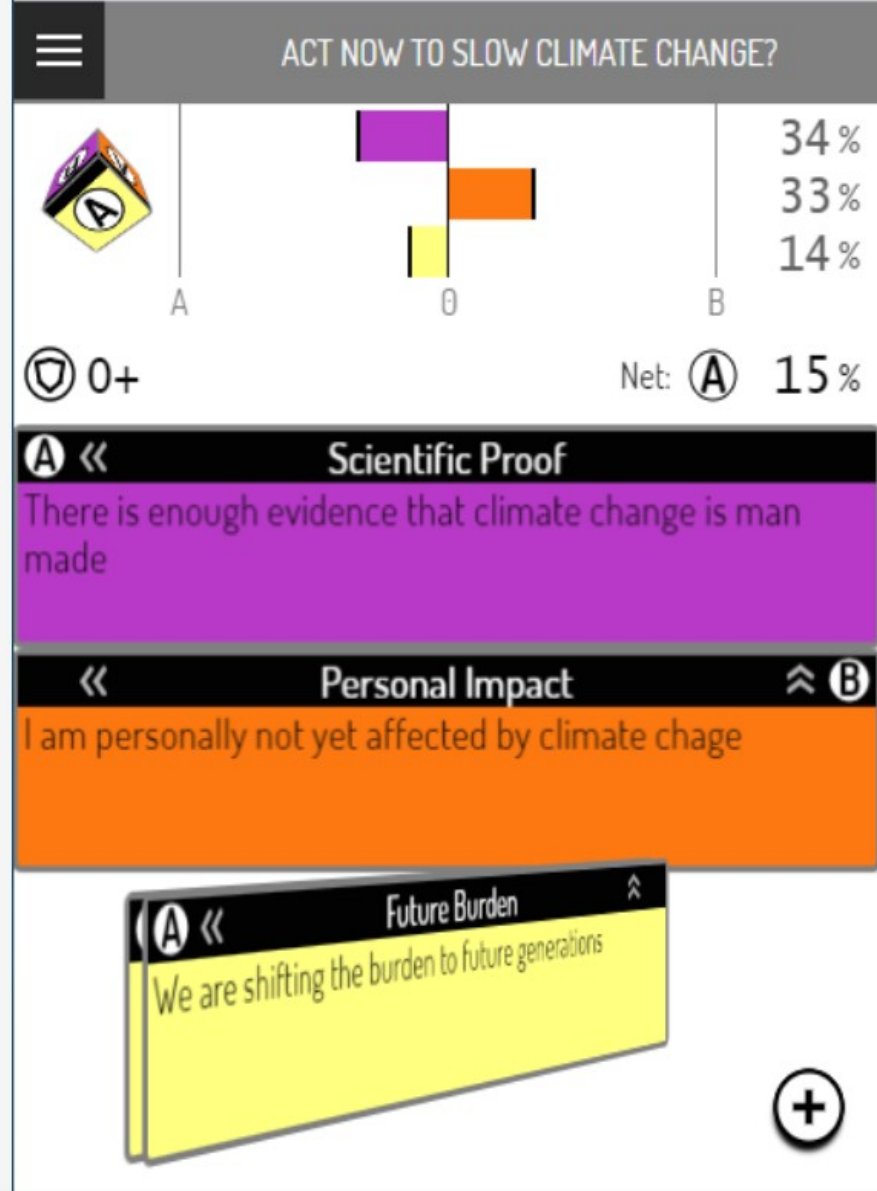

# votecube.com

decide together

- Fun, 1 minute polls
- Easy, meaningful info
- Voting outcome contrast
- Community decision
- No cookies
- Rate mass media
- Understand public opinion
